

Design and manufacture of standard or customized sensors, electronic systems and instrumentations used in

Industry

Product specifications

- load pin, dynamometer, load cell...
- Low level mV/V, 4-20mA, 0-10V, CAN, Wireless communication.
- Dual or triple channel, Single or multi-axis
- Single or double measurement span
- Range : 5N to 30 000kN

Applications

- Handling equipment, Personnel lifting equipment
- Overhead crane, marine crane
- Rolling out process
- Railway application
- Measures in energy sector: hydraulic, nuclear, renewable, diverse industries

Calibration test bench

- Traction / fatigue up to 1 200kN
- Compression calibration up to 4 000kN
